

STRUCTURE

TILES

Envirotiles, Britmet or TapcoSlate from stock or real slate, clay or concrete tiles of your choice in a variety of colours

MEMBRANE

Breathable, waterproof membrane between the top panels and tiles to assist with weatherproofing

INTERNAL PANELS

Built in timber battening for secure fixing plasterboard

HIP & RIDGE CAPPINGS

Slimline one-piece top cap cover for speed of installation which matches roof slate or tiles

WARMROOF LAYER

Extra 70mm top panel phenolic insulation which insulates the bars and eliminates potential thermal bridging issues creating a true 'warm roof' structure and provides 0.15 'U value' to comply with UK building regulations

RAFTER INSULATION

100mm insulation between the bars, retaining the heat within the room. Provides 170mm of insulation overall, bonded to the structural plywood deck

GUTTER & FASCIA

Available in a variety of colours and soffit depths

EAVES

Fully insulated eaves, eliminating any risk of condensation
